

## COPYBOX 2 BLU-RAY MULTIMEDIA

[Introduction](#) - [Features](#) - [Specifications](#)

## INTRODUCTION

The CopyBox 2 Blu-ray "MultiMedia" duplicator is a special duplicator for creating backups of flash memory (USB Stick, SD/MMC, Compact Flash, and MS/MS Pro) to Blu-Ray or DVD. Data can be copied directly from flash memory to a set of BD's or DVD's. Regular disk to disk duplication is also possible on the CopyBox 2 MultiMedia.

The following special features are available for creating backups from flash memory to BD/DVD:

**Multi-Session**

Data from different flash memory sticks/cards can be copied to one BD or DVD in multiple sessions.

**Disc Spanning**

Data from one large flash memory stick/card can be split to several BD's or DVD's.

**Multi-Disc**

Data from one flash memory stick/card can be simultaneously copied to multiple BD's or DVD's.

A USB stick or memory card is placed in one of the slots in the front of the controller. Using the control buttons and LCD display the required duplication or backup function can be selected. With one press on the button the backup process is started. Due to the simple operation the CopyBox 2 Blu-Ray MultiMedia is suitable for all users.
