

## COPYBOX 9 BLU-RAY

Introduction - Features - Specifications

### INTRODUCTION

The CopyBox 9 Blu-ray can simultaneously create nine copies (BD-R or BD-RE) of a Blu-Ray master disc. Next to recordable Blu-Ray, the CopyBox can also duplicate CD and DVD recordable discs. The CopyBox contains one Blu-Ray reader and nine high quality Blu-Ray writers. The unit also includes a USB data port at the front of the controller. The USB port allows data to be copied directly from USB stick (or any memory card using an adapter) to Blu-Ray, DVD or CD.

An **internal hard drive** can be fitted as an optional extra. The internal hard drive can store CD/DVD/BD images. Once copied to the hard drive, master discs are no longer required for duplication. The advantage when duplicating from the internal hard drive is the maximum reliability; read errors are eliminated.

The CopyBox 9 Blu-Ray can make nine BD duplicates at once at a maximum 12x speed (DVD maximum 16x speed). The fast writers can duplicate a 25 GB BD-R in approx. 9 minutes. This results in a production capacity of 56,2 BD's or 92 DVD's per hour.

Operating the CopyBox 9 Blu-Ray is quite simple; all functions are selected using the LCD display and control buttons on the front of the unit. This makes the CopyBox suitable for all users.

### FEATURES

- Stand-alone operation, no computer or software required.
- USB data port for direct duplication from USB to CD/DVD.
- Optional **internal hard drive** for storing CD/DVD image files.
- Suitable for all users, no computer knowledge required.
- One Blu-ray reader, nine Blu-ray writers.
- Maximum 12x Blu-Ray copy speed; a BD copy within 9 minutes.
- All common recordable CD, DVD and BD disks are supported.
- Easy operation through a LCD display and control buttons.
- 100% reliable copies due to the integrated control functions.
- Also available as **CD/DVD duplicator**.

### SPECIFICATIONS
