

Product Features

- Gives CD and DVD cases a folded and sealed finish
- Blu-ray & Nintendo DS conversion kits available
- Quality equal to that of larger machines
- Wrap up to 1200 cases per hour
- Large input hopper capacity
- Table-top unit
- Fully transportable

The Speedwrapper is a fully automatic table top unit designed to overwrap CD and DVD cases at high speed with little user intervention. When your output needs the professional edge or simply requires those receiving discs to know they have not been tampered with, wrapping is the ultimate solution. The Speedwrapper from JMB Robotique is an easy to use, cost effective option. It provides a neat even case wrap with perfect seams time after time. And now with the launch of the second generation Speedwrapper, both CD jewel case and DVD Amaray cases can be wrapped on a single Speedwrapper.

Easy to use

The Speedwrapper simply needs a power socket and roll of wrapping sheet to start wrapping cases. Users place up to 25 cases in the input tray and press the start button. Once operating, the unit can wrap up to 1200 cases per hour. Switching your Speedwrapper from DVD cases to CD case (and back) takes only a few adjustments and can be done in a fraction of the time taken by other wrapping machines. An optional Blu-Ray conversion kit is required if you wish to wrap Blu-Ray media cases (in addition to the standard CD or DVD) and a Nintendo DS conversion kit is now also available for those wishing to automatically wrap DS games and software.

Advanced technology

The speed wrap allow the user maximum control with sealing temperature being electronically controlled and adjustable. For safety, the unit will stop automatically in the unlikely event of a jam. This protects the user and allows them to efficiently proceed with wrapping discs with the minimum of trouble.

Retail ready CDs and DVDs

The speed wrap gives a wrapping finish equal to that of CDs and DVDs found in any retail outlet. Whilst shrink wrapping leaves cases with rough, unsightly seams, the speed wrap provides a neatly folded and sealed package.

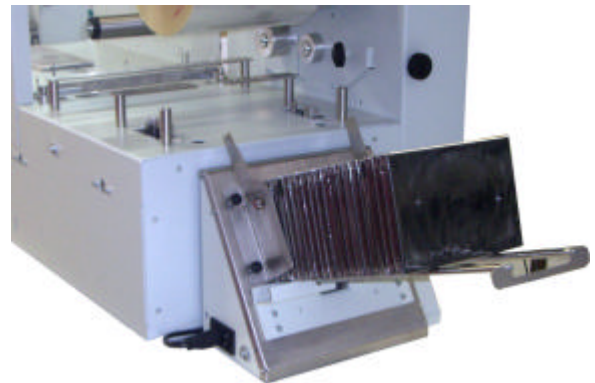

Specifications

Speedwrapper

Case handling:	CD Jewel cases & DVD Amaray cases
Throughput:	1200 per hour
Hopper capacity:	25
Operational voltage:	110-220V, 50/60Hz
