Genesis Flash XL2800
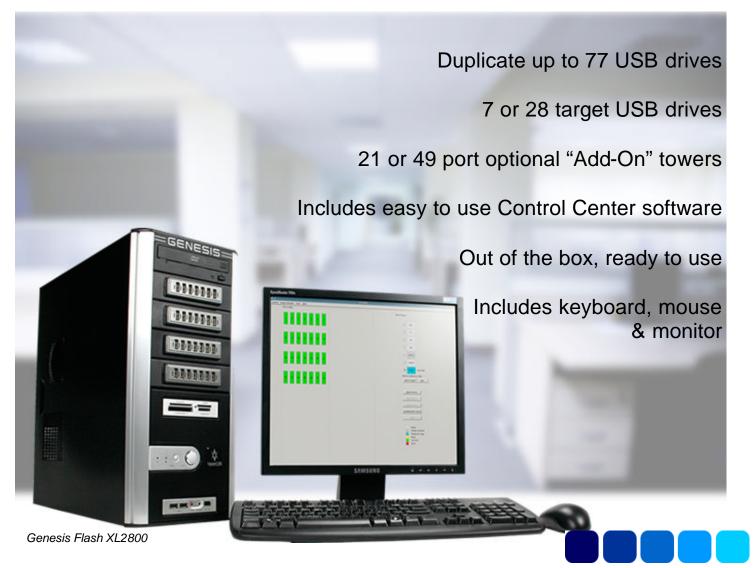

The Genesis Flash USB duplicators offer incredible functionality and expandability that has never been seen before. The powerful MasterUSB Command Center software, provides the fastest and most reliable USB duplication available. These systems come complete with all you need to begin copying USB drives, including custom software specially engineered to the USB duplication hardware.

The XL700 can duplicate up to 7 USB drives at a time, the XL2800 can duplicate up to 28 USB drives at a time. Both control centers have the option of combining and Add-On tower to increase the number of USB ports. Two types of Add-On towers are currently available, 21 or 49 USB ports, allowing you to increase your capacity to an incredible 77 USB drives!

The MasterUSB software ensures that managing & copying your USB drives is a simple & easy task: Save & organize your data on the internal hard drive for future use; Choose from multiple input sources such as CD/DVD, USB, SC card, Compact Flash, Smart Media or Memory sticks; Copy from the internal hard drive - quick retrieval; Simple, easy to use graphical interface.
