Introduction

The CopyBox Standard duplicator is a stand-alone CD/DVD copy system specifically designed to quickly and easily duplicate DVD's and CD's. The CopyBox Standard duplicators are available in three versions; Stand-Alone, with built-in hard drive and PC-connected. The CopyBox Standard duplicators are available with 1, 3, 5, 7, 9 and 11 burners.

Main advantages of the CopyBox:

- Quick, easy and inexpensive duplication of recordable CD and DVD.
- Suitable for all users, with no computer knowledge required.
- Standalone operation, no PC or software required.
- Fast copying at up to 24 x DVD write speed. (One copy in 5 minutes)
- Support for all recordable CD and DVD formats.
- Support for dual-layer (8.5 GB) DVD recordable.
- Simple operation through buttons and a LCD display on the control panel at the front.
- Available in three versions (Stand-Alone, with HDD, PC-connected) for all specific copying needs.

Warranty

General Warranty

On all CopyBox systems a standard carry-in warranty of two years applies. The warranty covers breakdowns or faults due to defect in materials or workmanship. It does not cover wear & tear, gradual deterioration in performance, failure caused by, use of unauthorised or unsuitable software, connection to incompatible equipment, ingress of moisture, fluid or foreign bodies, physical or electrical stress, connection to an electrical supply for which it has not been adjusted, lightning strike, incorrect storage, operation or use of the product in unsuitable environments or inappropriate applications, incorrect installation, accidental damage or damage caused by negligence or misuse, unauthorised modification, incorrect adjustment or repair by persons other than trained personnel. The following additional warranty provisions shall also apply:

The warranty will automatically expire if the warranty seals have been broken or removed.

The optical drives in a CopyBox duplicator are sensitive to certain types of pollution. We advise:

- § Do not smoke near the CopyBox duplicator.
- § Do not place the CopyBox in the same room as laser printers and photocopy machines.
- § Do not expose the CopyBox to fine dust particals such as construction debris.

Pollution of the CD/DVD drives is not covered under warranty.

Disclaimer

The main function of the CopyBox is making copies of DVD's and CD's which are in users possession and duplication of self-produced CD's or DVD's. Copying and duplicating DVD's and CD's which are not in users possession is illegal and may result in criminal prosecution.

Installation

Contents of the package

The CopyBox package comes with:

- CopyBox duplicator
- Power cord
- Printed User Manual
- USB cable (PC-Connected version)
- Software CD (PC-Connected version).

Before installation check the package and supplied parts for physical damage. Also check the warranty seal on the CopyBox is not damaged or missing. If the product is damaged, please contact your dealer immediately.

CopyBox Installation

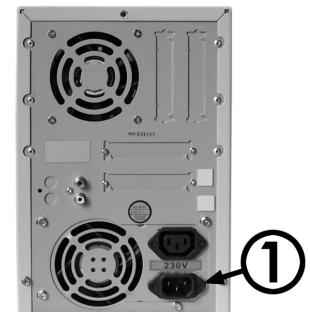

- Placement

Take the CopyBox duplicator from the packaging and place it on a dry, dust-free and stable surface. To avoid dangerous situations, do not place any objects which cover the CopyBox (rug), are full of liquid (vase) or produce heat (lamp).

- Connection

Plug the power cord into the power cord socket on the back of the CopyBox. (1) Connect the power cord into an electrical outlet. Push the power switch on the front side of the CopyBox to turn on the power.

The CopyBox is now ready for use.

Installation of the CopyBox 1 with USB connection

For installation of the CopyBox 1 with USB connector please see page 26 of this manual.

Installation of CopyBox 3, 5, 7 and 9 "PC-connected"

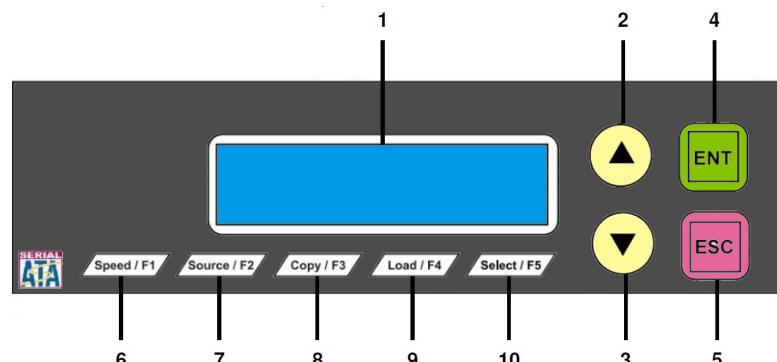

For installation of the CopyBox PC connected duplicators please see page 24 of this manual.

Instructions

The CopyBox duplicator offers a control panel on the front. Using this control panel, the various functions can be set. The control panel consists of the following components:

1. LCD Display
2. Selector button "Up"
3. Selector button "Down"
4. Selector button "Enter"
5. Selector button "Escape"
6. Function button F1 (Speed)
7. Function button F2 (Source)
8. Function button F3 (Copy)
9. Function button F4 (Load)
10. Function button F5 (Select)

Function buttons F1 to F5 are pre-programmed to use a number of frequently used features. It is possible to assign functions yourself to the F1 and F2 buttons from the Advanced Setup menu. (13-18 and 13-19)

Using the control panel the following twelve main menu functions can be selected:

- | | |
|----------------|------------------------------------|
| 1. Copy | 7. Disc Info |
| 2. Test | 8. Select Source |
| 3. Test & Copy | 9. Image |
| 4. Verify | 10. Edit Track |
| 5. Compare | 11. Setup |
| 6. Prescan | 12. USB Mode (PC-Connected models) |

1. Copy

The "Copy" function is intended to copy data from a "Source" disc (master) directly to blank DVD±R or CD-R discs (targets). The CopyBox can copy both "On The Fly" (directly from disc to disc) and from the (optional) internal hard drive. For copying from hard drive please see menu 8 (Select Source) and 9 menu (Image). For direct copying from disc to disc use the following procedure:

- Select the "Copy" function with the "Up" or "Down" button.
- Open the drawers of the DVD reader and DVD writers.
- Place the Master disc in the DVD reader.
- Place DVD or CD Recordables in one or more DVD writers and close the drawers of the DVD reader and DVD writers.
- Press "Enter" button to start the copy process. If there are already recorded DVD±RW discs used these will first be erased automatically.
- During the copy process displayed time and number of MB's will reduce while the completed percentage increases.

1. Copy
4300MB

Copying - 16x 0%
4300 MB 06: 30

- When the copy process is finished, the result is displayed on the LCD screen. The DVD writers are automatically opened.
- If data is not duplicated "On the Fly" but from the optional hard drive (see Chapter 8 and 9) the selected hard drive partition will be displayed on the LCD screen.

OK: 07
Time: 00: 05: 10

1. Copy P: A
4300MB

2. Test

The "Test" function is almost identical to the "Copy" function. The difference is the copying process is simulated without the DVD or CD recordables actually being written. This function can be used when there are problems reading from a master disc or burning recordable discs. Using option 12.6 (Burn-In) the test mode can be automatically repeated several times.

Attention! This function can be used with CD-R or DVD-R discs. DVD+R discs do not support this feature.

- Select the "Test" function with the "Up" or "Down" button.
- Open the drawers of the DVD reader and DVD writers.
- Place the Master disc in the DVD reader.
- Insert DVD - R or CD-R discs in one or more DVD writers and close the drawers of the DVD reader and DVD writers.
- To start, press the "Enter" button.
- When the test process is completed, the result is displayed on the LCD screen.

2. Test
4300MB

Testing - 16x 0%
4300 MB 06: 30

OK: 07
Time: 00: 05: 10

3. Test & Copy

This function is used to first test a master disc and copy the disc afterwards.

Please Note! This function can be used with CD-R or DVD-R discs. DVD+R discs do not support this feature.

- Select the "Test & Copy" function with the "Up" or "Down" button.
- Open the drawers of the DVD reader and DVD writers.
- Place the Master disc in the DVD reader reader.
- Insert DVD-R or CD-R discs in one or multiple DVD±RW drives and close the drawers of the DVD reader and DVD±RW drives.
- Press the "Enter" button to start the test- and copy process. If there are already recorded DVD±RW's used these will first be erased automatically.

3. Test & Copy
4300MB

Testing - 16x 0%
4300 MB 06: 30

- The testing process will now begin.
- Once the testing process is completed successfully, the copying process will start.
- Once the entire process is completed, the LCD display shows the result.

Copyi ng - 16x	0%
4300 MB	06: 30
OK: 07	
Time: 00: 05: 10	

You can now start the next test and copy session using the same master disc or place another disc into the DVD reader.

4. Verify

With this function, the copied discs can be checked for read errors. After duplicating, leave the CD's or DVD's into the DVD writers.

- Select the "Verify" function using the "Up" or "Down" button.

4. Verify
4300MB

- Press "Enter" button to start the verify process.

Verify - 16x	0%
4300 MB	06: 30
OK: 07	
Time: 00: 05: 10	

5. Compare

Using the Compare function the master disc and the recordable discs can be compared after duplicating. It checks whether the master disc and copies are 100% identical. The Compare function can not be used with Audio-CD and Video-CD formats.

- Select the "Compare" function with the "Up" or "Down" button.

5. Compare
4300MB

- Press "Enter" button, the compare process will now start.

Compare - 16x	0%
4300 MB	06: 30

- Once the process is completed, the LCD display shows the result.

Compare	OK: 7
Fail: 0	Diff: 0

- The drawers of the DVD writers are opened. Press "Enter" button to view the details of the master disc.

Src: 01	DVD- ROM
Total : 4300 MB	

- Press the "Enter" button to see details of the target discs. If the discs are identical the following appears on the LCD display:

Tgt: 02	DVD- RW
Identical	

- When an error occurs during the compare process this will show on the LCD display as "failure". By twice pressing the "Enter" button, the error is displayed on the LCD display.

Tgt: 02	DVD- RW
TOC not match	

6. Prescan

The "Prescan" function is used to test whether the master disc can be read correctly. Also the read speed of the DVD reader drive can be tested with this function.

- Select the "Prescan" function with the "Up" or "Down" buttons.
- Open the drawer of the DVD reader.
- Place the Master disc the DVD reader.

- Press "Enter" button to launch the "Prescan" feature.

- When the "Prescan" process is terminated and the source disc can be read correctly, the LCD screen shows the following result:

6. Prescan

4300MB

Scanning - DVD 0%

4300 MB 06: 30

Prescan OK!

7. Disc Info

The "Disc Info" function is used to view information about the source and target discs.

- Select the "Disc Info" function with the "Up" or "Down" button.

- Select the desired disc (the source or one of the targets) with the "Up" or "Down" button and press "Enter" button. The disc information is now displayed on the LCD display:

7. Disc Info

4300MB

DiscType: DVD+R

Capacity: 4300MB

8. Select Source

The "Select Source" function allows either the DVD reader, one of the DVD writers or the (optional) hard drive to be selected as source drive. "The source drive" is the drive from which data is loaded for duplication.

- Select the "Select Source" function with the "Up" or "Down" buttons

- Press "Enter" button and use the "Up" and "Down" buttons to select the desired source. CH00 is used for the optional internal hard drive, CH01 is used for the CD/DVD reader; the top drive.

8. Select Source

- After the desired source is selected press the "Enter" button and the LCD display will show the selected source:

Src: SUPER MULTI

01 CH01

S-MULTI selected

If the optional hard drive is selected as the source, and none of the partitions contain data, an error message will appear on the LCD display. You can now select any other source or copy data to one of the hard drive partitions. More information about the use of the hard drive can be found under menu 9.

9. Image

Function 9 is only usable if the optional internal hard drive is installed. This menu consists of the following ten components:

1. Load
2. Delete Image
3. Image Info
4. Compare Image
5. Select Image
6. Select Source Drive
7. Image Format Info
8. Edit
9. Format HDD
10. Load Image Method

Master CD's and DVD's can be loaded onto the internal hard drive of the CopyBox as "image file". An image file is an exact copy of an entire CD or DVD. The internal hard drive of the CopyBox is divided into partitions of 1 GB. When loading a CD or DVD image the first available partition letter is automatically assigned. If desired, the partition ID can also be assigned manually (see function 9.8) Depending on the size of the image multiple succeeding 1 GB partitions are used.

Example: a 4.7 GB DVD is loaded to the internal hard drive. Here, the first free partition (A) is assigned to the image file. As a 4.7GB DVD requires five partitions of 1 GB, partition letters B, C, D and E also will be reserved. The next free partition, after loading the DVD will be partition "F".

Select the "Image" function in the main menu using the "Up" or "Down" button and press the "Enter" button to select function 9.1.

9.1 Load

- Select the "Load" function with the "Up" or "Down" button. The "Load" feature allows an image file from the DVD reader drive to be loaded on the internal hard drive. P:A means "partition A" is selected.
- Press "Enter" button to copy the image file to the hard drive.
- When the DVD image was copied successfully, the following message will show on the LCD display:

9-01. Image P: A
Load

Load - A - 16x 100%
4300 MB 05: 10

Image Load OK

9.2 Delete Image

To remove an image file from a partition the "Delete Image" function is used.

- Select the "Delete Image" function with the "Up" or "Down" button and press "Enter" button.
- The CopyBox will ask whether the image should be removed. Select "Yes" or "No" with the "Up" or "Down" button and press "Enter" button.
- After the image file is removed the following message appears on the LCD display:

9-02. Image P: A
Delete Image

Delete Image? Yes
A: DVD 4300MB

Partition: A
Image is deleted

9.3 Image Info

This feature displays information about an image file on a specific partition.

- Select the "Image Info" function with the "Up" or "Down" button.

9-03. Image P: A

Image Info

- Press "Enter" button to view the image file information

Img Type: DVD+R

Capacity: 4300 MB

9.4 Compare Image

The "Compare Image" function is used to compare the master disc and the copied image file on the hard drive. It checks if the master disc and the copied image file are 100% identical. The Compare function can not be used with Audio-CD and Video-CD formats.

- Select the "Compare Image" function with the "Up" or "Down" button.

9-04. Image P: A

Compare Image

- Press the 'Enter' button to start the compare process. The LCD display will show the following information:

Comp - A- 16x 100%

4300 MB 05: 10

- Once the "Compare" function is completed, the following information shows on the LCD display:

Compare OK: 1

Fail: 0 Diff: 0

- Press the 'Enter' button to view the details of the master disc:

Src: 01 SUPER MUL

Total : 4300. 0 MB

- Press "Enter" button again to view the details of the target image. If the comparison is successful, the following information will appear on the LCD display:

Tgt: 00 HDD P: A

I denti cal

- If an error is detected during the comparison this will be reported on the LCD display. Press twice the "Enter" button to get information about the error.

Tgt: 00 HDD P: A

TOC not match

9.5 Select Image

Using this function the desired partition on the hard drive can be selected for duplication.

- Select the "Select Image" function with the "Up" or "Down" button and press "Enter" button.

9-05. Image P: A

Select Image

- Select a partition with the "Up" or "Down" button.

Select Partition

A: DVD 4300 MB

- After the partition is selected, the LCD display shows the selected result. Confirm your selection with the "Enter" button.

Set Partition to

A

9.6 Image Source Drive

Using this function, the DVD reader or any DVD writer can be selected as "source" drive. From the source drive image files are copied to the hard drive partitions. By default, the top drive is set as the source drive.

- Select the "Image Src Drive" function with the "Up" or "Down" button.

9-06. Image P: A
Image Src Drive

- Select the desired source drive with the "Up" or "Down" button.

Select Img Scr:
01 CHO1 S-MULTI

- Once the desired source is selected, press the "Enter" button and the LCD display will show the following information:

Load Image from
Drive ID-01

9.7 Image Format Info

Using this function, the format of the hard drive partitions can be viewed. The CopyBox uses F_S as the default format.

- Select the "Image Format Info" function with the "Up" or "Down" button.

9-07. Image P: A
ImageFormat Info

- Press "Enter" button. The LCD display shows the hard drive partitions format.

ImageFormat Info
F_S

9.8 Edit

This feature is used to add a title to the different hard drive partitions. Besides a main title, also two sub-titles can be entered for each partition. Each line can contain 12 letters or numbers.

- Select the "Edit" function with the "Up" or "Down" button.

9-08. Image P: A
Edit

- Press "Enter" button. Now the first character of the title can be entered. Use the "Up" or "Down" button to select the desired character and press "Enter" button. Repeat this process to enter the following characters.

Edit Title
?

- If needed, the two sub-titles for the partition can also be entered. Repeat the procedure described above in order to enter the characters.

Edit Sub1 Title
?

9.9 Format HDD

Using this function, the optional hard drive can be reformatted.

Please Note! All existing data on the hard drive will be erased when formatting.

- Select the "Format HDD" option with the "Up" or "Down" button and press "Enter" button.

9-09. Image P: A
Format HDD

- The CopyBox uses the F_S formatting as default.

HD Partition
FormatSelect? F_S

- Press "Enter" button. The CopyBox will ask if the hard drive needs to be formatted. Select "Yes" or "No" with the "Up" or "Down" button and press "Enter" button.
- After formatting the hard drive can be checked using the Verify function. Select "Yes" or "No" with the "Up" or "Down" button and press "Enter" button.

All data will be
lost, format ? Yes

Format HDD OK !
veri fy HDD? No

9.10 Load Image Method

By default, the partition letters are automatically assigned to image files on the internal hard drive. This function allows partition letters to be selected manually.

- Select the "Load Image Method" function with the "Up" or "Down" button.
- Press "Enter" button. There can now be selected for "Auto" (default setting) or "Manual". Use the "Up" or "Down" button to select the desired setting and press "Enter" button.

9-10. Image P: A
LoadImage Method

LoadImage Method
Auto

10. Edit Track

Using this special feature a new Audio-CD can be composed from several different Audio-CD's. The "Edit Track" function consists of three parts:

1. CD to CD Edit
 2. CD to HDD Edit
 3. Close Session
- From the main menu select the "Edit Track" function with the "Up" or "Down" button and press the "Enter" button to select 1.10 function.

10.1 CD to CD Edit

This feature allows to copy one or multiple audio tracks from an Audio-CD to a blank CD-R or CD-RW disc.

- Insert an Audio-CD in the DVD reader.
- Place one (or more) CD-R discs in the DVD writers.
- Press "Enter" button to select the desired audio tracks. 1/10 indicates track 1 of 10, 03:25 indicates the length of the track.
- Using the "Up" or "Down" button various tracks can be selected. Press "Enter" button to select a track. Once a track is selected you will see a "+" before the track number. A track can be deselected again by pressing the "Enter" button again.
- When finished selecting the desired tracks use the "End" function with the "Up" or "Down" button:
- To end the CD composition press the "Enter" button and choose "Yes" or "No".
- The CopyBox will burn the selected audio tracks on the target CD's. After the tracks are copied press the "Enter" button. The CopyBox will now ask if putting together the CD needs to be continued. Select "Yes" or "No" using the "Up" or "Down" button and press "Enter" button.
- If you have chosen to continue composing the source CD automatically ejects. The CopyBox will now ask for a next master Audio-CD.
- Once the next Audio-CD is inserted into the DVD reader drive, the "Edit Track" process can be repeated. Once all desired audio tracks are selected the "No" option needs to be selected with the "Up" or "Down" button when the CopyBox asks to continue editing.
- Confirm "No" with the "Enter" button. The CopyBox will now ask if the disc should be closed. Select "Yes" with the "Up" or "Down" button and press "Enter" button.
- If the CD is completed the following message appears on the LCD display:

10-01. Edit Track

CD to CD Edit

The Audio CD is now ready for use.

10.2 CD to HDD Edit

This feature allows several audio tracks to be selected and placed on the internal hard drive before burning a CD-R or CD-RW. This feature is available only if the CopyBox is equipped with the optional hard drive.

- From the "Edit Track" menu (10) select the "CD to HDD" function with the "Up" or "Down" button and confirm with the "Enter" button.

- Then walk through the steps described in section 10.1 until all desired audio tracks are written to a temporary partition of the hard drive. When the CopyBox asks whether editing needs to be continued with a next disc; choose "No" with the "Up" or "Down" button and press "Enter" button.

- Now the CopyBox will ask whether the tracks need to be burned onto a CD or written to a disc image. Choose "Burn" with the "Up" or "Down" button if the tracks need to be burned to a CD and confirm using the "Enter" button.
- The CopyBox will now write the selected audio tracks to the CD recordable discs. Once the writing process has been completed the following message appears on the LCD display:

- If the selected audio tracks must first be written to a hard drive partition select "Move" with the "Up" or "Down" button. Confirm your selection with the "Enter" button.

- Then choose a hard drive partition where the audio tracks need be moved to:

- Confirm your selection with the "Enter" button. All audio tracks will be moved to the selected partition. Once the move is complete the following message appears on the LCD display:

- If the selected partition already contains data the CopyBox will ask whether existing data should be overwritten. Select "Yes" or "No" "Up" or "Down" button and confirm with the "Enter" button.

11. Setup

Using the "Setup" menu all CopyBox settings can be adjusted. However, it is advisable not to change the default settings as long as there is no need for this. The "Setup" menu consists of the following items:

- | | |
|---------------------|----------------------|
| 1. Language | 13. Button Sound |
| 2. Burn Speed | 14. Device Info |
| 3. Read Speed | 15. System Info |
| 4. Auto Start Drive | 16. Quick Erase |
| 5. Startup Menu | 17. Full Erase |
| 6. Auto Verify | 18. Auto Close Tray |
| 7. Auto Compare | 19. Quick Compare |
| 8. Auto Prescan | 20. Tray In/Out |
| 9. Eject Disc | 21. Boot Time Delay |
| 10. Burn On The Fly | 22. Start Tray Eject |
| 11. Burn Mode | 23. Disc Redetect |
| 12. Display Time | 24. Show Burn Speed |

Please Note! When a setting is changed remember to confirm this by pressing the "Enter" button.

- Select the "Setup" menu from the main menu using the "Up" or "Down" button and confirm with the "Enter" button.

11.1 Language

With this function, the language can be set. The default setting is English.

- Select the "Language" option in the "Setup" menu with the "Up" or "Down" button and press "Enter" button.
- Select the desired language and confirm with the "Enter" button.

11.2 Burn Speed

This function allows the different maximum write speeds for CD, DVD and Audio CD to be set manually. When using the default setting "Auto" the CopyBox determines the maximum speed according to the used recordable media. In some cases it may be desirable to manually lower the maximum burn speed.

- Select the "Burn Speed" option from the "Setup" menu with the "Up" or "Down" button and press "Enter" button.
- With the "Up" or "Down" button, the settings can be selected for CD, DVD and Audio-CD. Confirm your selection with the "Enter" button.
- Select the desired maximum writing speed with the "Up" or "Down" button. Confirm by pressing the "Enter" button.

12.6 Burn-in

Using the "Burn-in" function three "burn-in" procedures can be automatically performed several times; "Erase and Copy", "Test" or "Compare". When using the "Erase and Copy" test rewritable disc first will be erased and then duplicated. For the "Erase and Copy" procedure rewritable CD or DVD discs are required. The "Test" procedure simulates the entire copying process without actually writing to recordable discs. For the "Test" procedure CD-R or DVD-R disc's are required. DVD+R discs do not support the test function. The "Compare" procedure checks whether the master disc and the copied discs are identical.

- Select the "Burn-in" option from the "Advanced Setup" menu with the "Up" or "Down" button and press "Enter" button.
- Select "Erase and Copy", "Test" or "Compare" as required test with the "Up" or "Down" button and press "Enter" button.

Installing PC-Connected CopyBox 3, 5, 7, 9

The "PC-connected" versions of the CopyBox duplicators can be connected to a PC through a USB 2.0 connection. Through this USB connection CD/DVD "ISO" images can be loaded onto the internal hard drive. Please follow the procedure below to properly install a PC-connected CopyBox.

Software Installation

With the PC-connected CopyBox an installation CD is supplied with the necessary software;

CopySmart Image Manager

Using the Image Manager software, CD/DVD ISO image files can be loaded from a PC to the internal hard drive of the CopyBox duplicator.

To install the software place the installation CD into the DVD drive of your PC. Start the "Setup.exe" file on the installation CD manually.

Hardware Installation

Included with the PC-Connected CopyBox are a power cord and an USB cable. Connect the CopyBox with the power cable to a power supply. Then connect the CopyBox to an available USB 2.0 port of a PC with the supplied USB cable. The flat USB connector is to be connected to the PC, the square end has to be connected to the rear of the CopyBox.

The installation of the PC-connected CopyBox is now complete. Take the following steps to properly set the CopyBox.

Switching USB Connection On/Off

Turn the CopyBox on by pressing the On/Off button on the front.

- Once the CopyBox has started appears the "Copy" function in the LCD display.

- The USB Option must first be activated in the "Advanced Setup" menu (12). To select this menu, press the "Esc" button for 3 seconds. The CopyBox beeps when menu 12 is selected.

- Select option 12-13 ("USB Option") with the "Up" or "Down" button and confirm with the "Enter" button. Select "On" with the "Up" or "Down" and confirm the choice with the "Enter" button. The "Advanced Setup" menu will now change into menu 13. Use the "Esc" button to Advanced To leave Setup menu and return to the main menu.

- The USB option in the PC Connected CopyBox is now enabled. In the main menu now an additional option (Menu 12 "USB Mode") is available. With this function, the USB connection can be switched on and off. Select menu option 12 (USB Mode) with the "Up" or "Down" button and confirm with the "Enter" button.

- To activate the USB connection select "Yes" with the "Up" or "Down" button and confirm with the "Enter" button. The CopyBox will now be restarted automatically in PC-connected mode.

1. Copy

12. USB Mode

USB Mode Swi tch

To On ? Yes

Using the Image Manager software on the PC, CD/DVD ISO images can now be loaded from and to the built-in hard drive of the CopyBox. The hard drive can now only be accessed via the PC USB connection.

To start duplicating images files from the internal hard drive after loading CD/DVD image files from a PC, the USB connection first needs to be disabled:

- Select menu 12 (USB Mode) from the main menu using the "Up" or "Down" button and confirm with the "Enter" button. Select to disable the USB connection "Yes" with the "Up" or "Down" button.
- The CopyBox will now automatically restart and boot into the "Copy" menu. The USB connection is now disabled.

USB Mode Swi tch
To Off ? Yes

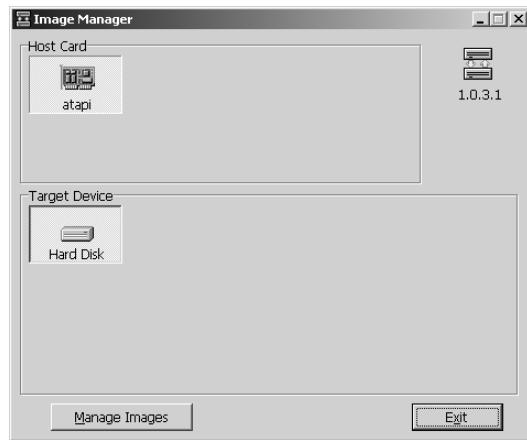

1. Copy P: A

The PC-Connected CopyBox is now ready for duplication. To be able to duplicate from the internal hard drive, the hard drive needs to be selected as the "source" drive. Refer to Menu 8 ("Select Source") in this manual. To select specific CD or DVD images on the hard drive of the CopyBox menu option 9 ("Image") needs to be used. For more information about the "Image" menu refer to section 9 of this manual.

CopySmart Image Manager

Using the CopySmart Image Manager software, CD and DVD image files can be managed on the hard drive of the CopyBox. The USB connection on the CopyBox must be activated before the Image Manager software is started.

Once the Image Manager software is launched, the "Host Card" and the "Target Device" are visible. If these are not visible the USB connection is not active. Select the "Manage Images" button at the bottom of the screen to view the hard drive partitions.

In the "Manage Images" screen the contents of the CopyBox hard drive can be viewed and images can be managed. The hard drive partitions are 1GB in size and are listed alphabetically. When DVD or dual-layer DVD images are loaded multiple 1 GB partitions will be used for one image file.

Loading Image

A CD or DVD (ISO) image can be copied from the PC to the CopyBox hard drive with the "Load From .ISO file" option. Besides ISO images also CPM or DVM images can be loaded.

Exporting Image

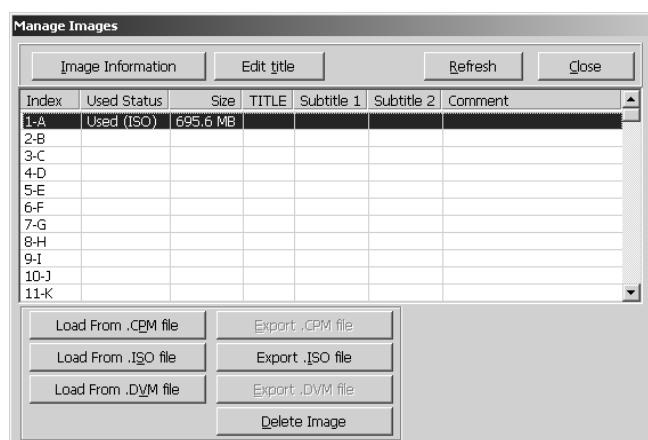

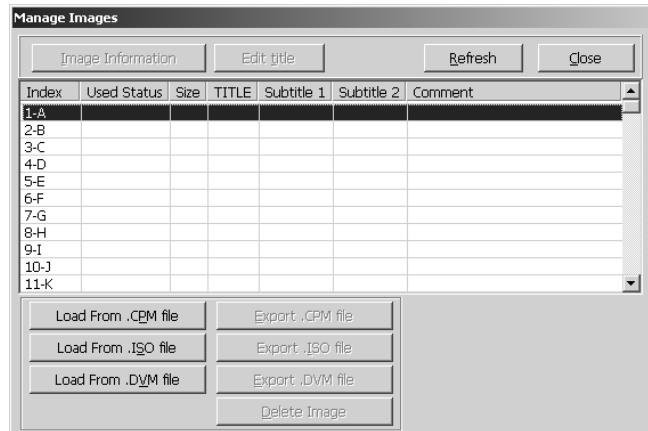

ISO, CPM and DVM images can also be copied from the CopyBox hard drive to your PC. Use the "Export" options.

Removing Image

Hard drive images can be deleted using the "Delete Image" option.

Renaming Image

The title of each image file on the hard drive can be changed using the "Edit title" option.

Installation CopyBox 1 with USB Connection

The CopyBox 1 can optionally be supplied with a USB connection. The use of this USB connection, however, differs from the CopyBox 3, 5, 7, and 9 "PC-Connected" models. Through the CopyBox 1 USB connection, both DVD reader and the DVD writer can be used as an external drive on the PC. If an external hard drive is connected through the CopyBox eSATA (external SATA) port, the external hard drive can also be accessed on the PC. This enables CD/DVD ISO image files to be copied from PC to the external hard drive.

Software Installation (only when an external hard drive is connected to the CopyBox eSATA port)

With the PC-connected CopyBox an installation CD is supplied with the necessary software:

CopySmart Image Manager

Using the Image Manager software, CD/DVD ISO image files can be loaded from a PC to the external hard drive connected to the eSATA port of the CopyBox 1 duplicator.

To install the software place the installation CD into the DVD drive of your PC. Start the "Setup.exe" file on the installation CD manually.

Hardware Installation

Included with the PC-Connected CopyBox 1 are a power cord and an USB cable. Connect the CopyBox 1 with the power cord to a power supply. Then connect the CopyBox 1 to an available USB 2.0 port of a PC with the supplied USB cable. The flat USB connector is to be connected to the PC, the square end has to be connected to the rear of the CopyBox 1.

The installation of the PC-connected CopyBox 1 is now complete. Take the following steps to properly set the CopyBox 1.

Enable USB Connection

Turn on the CopyBox 1 by pressing the On/Off button on the front.

- Once the CopyBox has started the "Copy" function appears in the LCD display.
- If the USB function is not activated on the CopyBox 1 (Menu 12 "USB Mode" is not visible), this function can be activated using the "Advanced Setup" menu (12). To select this menu, the "Esc" button needs to be pressed for 3 seconds. The CopyBox beeps when menu 12 is selected.
- Select option 12-14 ("USB Option") with the "Up" or "Down" button and confirm with the "Enter" button.
- Select "Menu On" with the "Up" or "Down" button and confirm with the "Enter" button. Menu 12 will now change in menu 13. Use the "Esc" button to exit the Advanced Setup menu and return to the main menu.
- The USB option in the CopyBox 1 is now activated. In the main menu an additional option (Menu 12 "USB Mode") is now available. This feature allows the USB connection to a PC to be switched on and off. Select menu option 12 (USB Mode) with the "Up" or "Down" button and confirm with the "Enter" button.
- The CopyBox will now ask if the USB mode needs to be activated. Select "Yes" with the "Up" or "Down" button and confirm with the "Enter" button.

D1: DUAL D2: HDD

The CopyBox 1 offers the ability to access two drives ("D1" and "D2") through a PC. This can be either the DVD reader, the DVD writer or an(external) hard drive. Using the menu, drives can be assigned to D1 and D2.

- Select "D1 Drive Select" with the "Up" or "Down" button and confirm with the "Enter" button. Now the "DUAL" (DVD writer) drive can be selected. Confirm the choice with the "Enter" button.
- Select "Drive Select D2" with the "Up" or "Down" button and confirm with the "Enter" button. Now the "DVD" (DVD reader) drive or "HDD" (Hard Drive) can be selected. Confirm the choice with the "Enter" button.
- To disable the USB mode, and to return to the stand-alone mode, select "Copy Mode" with the "Up" or "Down" button. The CopyBox will ask if it needs to be switched back to SA mode. Select "Yes" with the "Up" or "Down" button and confirm with the "Enter" button.
- The CopyBox will now automatically restart and boot into the "Copy" menu. To enable the USB connection again use menu 12 (USB Mode).

Now Change USB1
