It shows disc information, including Disc Type, Support Burn Speed, and Data Size.

4. Utility

4-1 Disc to Disc

- * in order to perform disc to disc copy, you will need an empty USB/memory card as temporarily buffer. Before and after the process, your USB/memory card which is applied as a temporality buffer will be erased and reformat, Please make sure the data of USB/memory card can be erased.
- * Please check the capacity of USB/memory card and make sure it is bigger than the data in source disc which you want to copy. For example, if you want to copy a 2G data of a DVD disc, you will need a 4G USB in order to have enough temporarily buffer to store the data.
- * Please follow the instructions below to make Disc to Disc copy.
- ① insert the source disc and an empty USB, follow the instruction to select "△" and "o" to erase the USB and store the data from the source disc to the USB/memory card.
- ② Follow the instruction to insert the blank disc to start disc to disc copy.
